

Discovering Technology and Policy

Florida Earth international teams visit some of the world's most advanced water and sea-level rise adaptation projects as they meet those involved with their development and operation. Above: 2013 US-Netherlands Connection's Professional Team at Rijkswaterstaat Headquarters in The Hague on May 13.

KNOWLEDGE EXCHANGE IN ADAPTATION AND RESILIENCE

UK PARTNERS

- UK ENVIRONMENT AGENCY
- UNIVERSITY OF OXFORD
- JACOBS ENGINEERING
- WOOD GROUP
- HR WALLINGFORD
- BRITISH CONSULATE MIAMI

Florida Earth Foundation is a public-private partnership composed of over 120 partners in the industry, academia, government and nonprofit sectors. Florida Earth's vision is "Through unbiased world class education and collaborative problem solving, FEF connects the domestic and international community of water experts, policy makers, students and stakeholders to exchange knowledge and develop resiliency solutions for the benefit of a sustainable Florida, nation and globe." Being primarily a partnership builder, Florida Earth's partners bring concepts to the organization for development and implementation. The organization's non-advocacy mission allows it to provide a safe platform for the dissemination of science and ideas without agendas attached. We are a type of "honest broker," where issues can be discussed and solutions to challenges examined and implemented.

Solutions to resilience problems through the sharing of knowledge...

ADAPTATION AND RESILIENCE

Florida Earth is proud to announce its second international program for professionals, the UK Resilience Forum, to be held Monday, March 18 through Friday, March 22, 2019 at the University of Oxford. Building on the format of our US-Netherlands Connection's Professional Program (USNC Pro), the UK Resilience Forum explores British expertise in resilience using case studies and field experiences around flood risk management initiatives with a special focus on how resilience can be financed. Operating out of historic Oxford University's St John's College, the delegation will have a day focused on measures to mitigate River Thames flooding through engineered and natural solutions, a visit to the world-famous HR Wallingford Physical Modeling Center and a visit to the Satellite Catapult Center.

2019 DATES

The 2019 USUK Resilience Forum will be in the UK from Monday, March 18 through Friday, March 22.

LOCATION

The USNC team spends the week in several locations throughout England but operates out of St. John's College at the University of Oxford.

MORE TEAM MEMBER INFORMATION

Team members are responsible for transportation to and from the UK and lodging. A registration fee of \$1950 covers most meals, in-country transportation, venue and admin costs. For more information, go to <http://floridaearth.org/usukpro2019>.

"IN LEARNING FROM OTHERS, WE CAN LEARN ABOUT OURSELVES..."

Colonel Paul Grosskruger, US Army Corps of Engineers (Retired) and Florida Earth Board Member
