

What is SWRR?

The Sustainable Water Resources Roundtable (SWRR) is a Federal advisory committee that is a subgroup of the Advisory Committee for Water Information (ACWI) created by the Federal Advisory Committee Act of 1972. SWRR meets in Washington DC at least once a year and goes to other locations in the US at least once a year. For more information about SWRR visit <http://acwi.gov/swrr>. For this meeting, Florida Earth Foundation hosts SWRR in Southwest Florida at Florida Gulf Coast University and uses Babcock Ranch, America's newest "City of Tomorrow" as a case study of innovation and inspiration for water-related solutions to environmental and development problems
